It is almost impossible to wear out the Hupmobile. The first Hupmobiles, built 12 and 13 years ago, are in use today, all over the world.

Owners, and those who buy in the used car markets, would tell you its depreciation is slower and smaller; that its price as a used car is proportionately higher.

Back of its longer life and rare economy, is, of course, the way the Hupmobile is built

The fact is that many of its important parts are identical, in material and in manufacturing costs, with the same parts in the cars of the highest price; and Hupmobile shop practices are exceptionally fine and close.
